This is a solid BlackjackV21 game with lots of additional resources in case you wanted to take your play to a real casino. There are instructions and tutorials in basic strategy as well as in card counting. It's also good if all you want to do is just play some no pressure Blackjack.

The game runs fine on modern systems. The only downside I can find is that Steam does not accurately track playtime for the game. The play time tracker seems to be related to the "tips" aspect of the software that opens in a browser window rather than the actual executable. This is not a deal breaker since there are no trading cards or features reliant on play time.

EDIT: The playtime issue can be addressed by right-clicking the game in library and launching the "tips" portion to open the browser window. Then go into local files and manually run the .exe to launch the game. This will record play time if it's important to you.
